SUMMARY

Hello! My name is Charlie Kopp. I am a statistics geek with a passion for interpretable machine learning, mental health advocacy and highlighting the unique connections that bring humans together in mind and spirit.

EDUCATION

University of California, Los Angeles (UCLA)

B.S. in Statistics and Data Science, minor in Digital Humanities

Thesis: Predictive Modeling of User-Level Purchasing Behavior on Online Marketplace

GPA: 3.7

June 2026

Santa Monica College

A.S. in Mathematics

GPA: 3.7

June 2024

WORK EXPERIENCE

Data Science Intern, Honeit Software

Feb 2026 - present

Refined and fit supervised prediction model for talent acquisition usage. Tasks include optimizing data workflow from server to local modeling environment, feature selection, model fitting and parameter interpretation.

Research Assistant, UCLA Dept. of Statistics & Data Science

April 2025 - April 2026

Worked with Yvonne Yang, MD, PhD and Thomas Maierhofer, PhD on clinical psychiatric data investigating potential indicators of schizophrenia. Responsible for data management, visualization, model fitting, and interpretation.

Volleyball Coach, Crossroads School, Westside VB

Aug 2021 - present

Coach boys' and girls' volleyball teams as assistant and head coach. Responsible for developing and implementing training programs to improve team cohesiveness and performance.

PROJECTS

Self-Identified Trauma & Brain Inflammation Research

[Link to presentation](#)

Spring 2026

Processed set of clinical data with goal of measuring the connection between self-indicated trauma (based on the Traumatic Experience Checklist survey) and brain inflammation measured from PET scans. Fit multiple fixed linear models and a mixed effects model accounting for repeated measures and covariate effects. Presented results at UCLA Undergraduate Research Week in May 2026

Executive Psychometric Mapping & Analysis

[Link to report](#)

Winter 2026

Analyzed psychometric assessment profiles for over 60,000 global senior business leaders to evaluate drivers of emotional and cognitive capacity. Executed two-way ANOVA, MANOVA, Welch t-tests, and OLS linear regressions in R to isolate structural determinants of leadership traits. Quantified practical effect sizes (partial η^2 and R^2) to show that country of upbringing explains 10% of cognitive adaptability variance, while management tenure accounts for less than 1%. Presented findings to a panel of industry experts, highlighting actionable insights for targeted marketing strategies.

Amazon E-Commerce Behavioral Modeling: Household Size Prediction

Link to report

Fall 2025

Cleaned and aggregated a heterogeneous dataset of user purchase histories from 5,000+ individuals to predict household sizes based on e-commerce behavior. Utilized regular expressions to cluster 1,800+ product categories into 19 umbrella metrics. Engineered user-level behavioral features, including average spending trends, order frequencies, and geographical location matrices. Tuned and evaluated Random Forest and XGBoost regression models using 5-fold cross-validation and random/grid search.

Rent Resilience Index

Link to presentation

Winter 2025, 15th ASA DataFest Finalist

Analyzed 150K+ U.S. commercial real estate leases and federal unemployment data from metro-areas in a team of 5. Developed a rent resilience index to quantify market resilience to economic stressors like vacancy and unemployment. Presented findings to professional data scientists and industry leaders; selected as one of 15 finalists out of 80+ teams.

SKILLS

Programming	R, Python, SQL, Quarto, LaTeX, C++, Java, GitHub, Git, CLI tools
Data	Cleaning & Formatting, Natural Language Processing, Data Scraping, Visualizations, Database Management
Modeling & ML	Interpretable Machine Learning (Variable Importance, Cetus Paribum Plots, ICE plots), Optimization, Pattern Recognition, Explanatory Model Analysis (Mixed Effects Models, ARIMA, Prophet, CTMC)
Software	Windows & MacOS, RStudio, Positron, VSCode, Notion, Obsidian, Tableau, Adobe Photoshop, Discord
