SUMMARY

Hello! I am Charlie, a statistics geek with a passion for mental health advocacy and research. I am currently studying Statistics and Data Science at UCLA, but what makes me special is my journey through sobriety and recovery. My hope is to use my experience and quantitative skills to make a positive impact on the world around me.

EDUCATION

University of California, Los Angeles (UCLA) <i>B.S. in Statistics and Data Science, minor in Digital Humanities</i> Thesis: Predictive Modeling of User-Level Purchasing Behavior on Online Marketplace	GPA: 3.7 June 2026
Santa Monica College <i>A.S. in Mathematics</i>	GPA: 3.7 June 2024

WORK EXPERIENCE

Data Science Intern, Honeit Software Refined and fit supervised prediction model for talent acquisition usage. Tasks include optimizing data workflow from server to local modeling environment, feature selection, model fitting and parameter interpretation.	Feb 2026 - present
Research Assistant Worked with Yvonne Yang, MD, PhD and Thomas Maierhofer, PhD on clinical psychiatric data investigating potential indicators of schizophrenia. Responsible for data management, visualization, model fitting, and interpretation.	April 2025 - April 2026
Volleyball Coach, Crossroads School, Westside VB Coach boys' and girls' volleyball teams as assistant and head coach. Responsible for developing and implementing training programs to improve team cohesiveness and performance.	Aug 2021 - present

PROJECTS

Self-Identified Trauma & Brain Inflammation Modeling Processed set of clinical data with goal of measuring the connection between self-indicated trauma (based on the Traumatic Experience Checklist survey) and brain inflammation measured from PET scans. Fit multiple linear models and a mixed effects model accounting for repeated measures and covariate effects.	Link to Presentation
Rent Resilience Index, 15th ASA DataFest Finalist Analyzed 150K+ U.S. commercial real estate leases and federal unemployment data from metro-areas in a team of 5. Developed a rent resilience index to quantify market resilience to economic stressors like vacancy and unemployment. Presented findings to professional data scientists and industry leaders; selected as one of 15 finalists out of 80+ teams.	Link to Presentation

SKILLS

Programming	R, Python, SQL, LaTeX, C++, Java, GitHub, Git, CLI tools
Data	Cleaning & Formatting, Natural Language Processing, Data Scraping, Visualizations, Interpretable Machine Learning, Pattern Recognition, Explanatory Model Analysis: Mixed Effects Models, ARIMA, Prophet, CTMC
Software	Windows & MacOS, RStudio, Positron, VSCode, Notion, Obsidian, Tableau, Adobe Photoshop, Discord
